## OPERATION

Patented, whisper quiet, ducted design allows system to suspend in attic — keeping noise & vibration out of your living space.

Hot attic air is forced outside through vents.

- Variable 10-speed ECM motor
- Automatically adjusts fan speed with built-in thermostat, no settings required
- Built-in humidistat to help keep humidity % in the attic under 60%
- This fan can consistently keep the attic cooler than a traditional attic fan
- Up to 3000 CFM on high at approximately 160 watts\*\*
- Down to 1000 CFM at approximately 15 watts\*\*
- Plug-and-play (no wiring)

QuietCool customers save money, enjoy better health, and stay cool for pennies an hour!

"I must say, I wasn't a believer until I went to my neighbor's house and saw how great the QuietCool system worked. Within a week, I had two fans installed in my house.

The dealer I got to install my fans took their time and showed me how the system worked and gave me tips on how to use it. I got my first bill and compared it to last year's bill and I saved almost 50% off my bill. My family absolutely loves it. This is one of the best investments I have made in my home.

Thank you QuietCool!"

Janelle Baker from Temecula, CA

## HOW IT WORKS | TRADITIONAL

**303-838-8116**

- Control your QuietCool from anywhere in your home (up to 15 fans)
- Set countdown time for each fan in your home (up to 12 hours)
- Adjust speed setting for each multi-speed QuietCool
- Local weather updates with notifications advising the best time to run your QuietCool
- Plug-and-play (no hard-wiring switches)
- Easily retrofit to any existing QuietCool

**1**  
Your open window brings in fresh, natural air.

**2**  
QuietCool fans draw cool air in through your home into the attic through ceiling mounted grilles.

\*\* Specs listed for the Smart Attic Fan are tested using pre-production h  
Exact specs may change upon launch.
